Name: Jemimah O. Dela Cruz

Address: Purok 5, Magsaysay, Bayombong Nueva Vizcaya

Contact Information:

- **0995 537 6646**
- **jemimahdelacruz0298@gmail.com**

PROFESSIONAL SUMMARY

Motivated and detail-oriented Bachelor of Science in Information Technology student with a strong interest in Full Stack Web Development. Knowledgeable in building web applications using HTML, CSS, JavaScript, PHP, Python, and MySQL, with experience developing academic and personal projects involving user interfaces, database management, CRUD operations, and basic system functionality. Possesses strong problem-solving, logical thinking, and debugging skills, with the ability to learn new technologies and development tools quickly. Eager to gain professional experience, contribute to software development projects, and continuously improve skills in both front-end and back-end development.

EDUCATION

Nueva Vizcaya State University

Bachelor of Science in Information Technology

2024 – Present

- **Dean's Lister (1st Year)**
  - Studying programming, database management, web development, software engineering, systems integration, and information technology concepts.
  - Developed academic projects involving web interfaces, databases, system design, and application development.

SEMINARS & TRAINING

- **Campus L.I.F.E Leadership Training Program (2025)**
  - Participated in leadership development activities focused on teamwork, communication, and decision-making skills.
- **Artificial Intelligence Seminar (2025)**
  - Attended a seminar on the fundamentals of artificial intelligence and its applications in modern technology, enhancing awareness of digital tools and innovation.
- **Secure Web Development Building Application (2026)**
  - Participated in training related to secure web application development and application-building concepts.

TECHNICAL SKILLS

Programming & Web Development

- HTML5 – Structure and organization of web pages
- CSS – Responsive layouts, styling, and user interface design
- JavaScript – Basic programming, DOM manipulation, validation, and interactive web functionality
- PHP – Server-side programming and basic web application development
- Python – Basic programming, logic, data processing, and application development

Database

- MySQL – Database creation, table management, relationships, queries, and CRUD operations
- SQL – SELECT, INSERT, UPDATE, DELETE, filtering, sorting, and basic relational database operations

Development Skills

- Front-End Development
- Back-End Development
- Database Management
- CRUD Operations
- Form Handling and Validation
- Responsive Web Design
- Basic API and System Integration Concepts
- Debugging and Troubleshooting
- User Interface Design
- Version/Project Organization

Tools & Technologies

- Visual Studio Code
- Git/GitHub
- MySQL
- Bootstrap
- MIT App Inventor
- Canva
- Microsoft Office / Google Workspace

RELEVANT ABILITIES

- **Front-End Development:** Able to create structured and responsive web pages using HTML and CSS, with JavaScript for interactive elements and basic client-side functionality.
- **Back-End Development:** Familiar with PHP and Python for implementing basic application logic, processing user inputs, and developing server-side functionality.
- Database Development: Able to create and manage MySQL databases, design tables, perform SQL queries, and implement basic relationships between data.
- **CRUD Development:** Understands Create, Read, Update, and Delete operations and their application in database-driven systems.
- **Form Handling:** Capable of creating forms, receiving user inputs, performing basic validation, and processing submitted information.
- **Problem Solving & Debugging:** Able to analyze programming errors, identify possible causes, test solutions, and improve code functionality.
- **System Development**: Familiar with planning system workflows, designing user interfaces, organizing system features, and connecting front-end, back-end, and database components.
- **Responsive Web Design:** Able to develop clean and user-friendly layouts that adapt to different screen sizes.
- **Database Management**: Can organize application data using relational database concepts and SQL queries.
- **Continuous Learning:** Willing to learn new programming languages, frameworks, libraries, development tools, and software development practices.
